WHERE IT SITS

FEELS

sweet · squishy · cheerful

THE IDEA

The name keeps bouncing: the o in mowgli is a yolk ball caught in the air just above the line, and that ball alone is the app icon.

ONE LOUD THING

One yellow ball in an otherwise plain wordmark.

WHERE IT DIFFERS

A wordmark-only route whose one colour is a moving part, not a tint.

THE MARK

'mowgli' in cocoa or cream; the o is a yolk ball lifted off the baseline mid-bounce.

logo

The wordmark is the primary logo. Use it wherever the space allows; every other version is derived from it.

CLEAR SPACE

Keep at least x = 1 × the wordmark's cap height free on every side. (inferred from the drawing; confirm before print)

- Use the supplied files in kit/logo; never retype or redraw the wordmark.
- Scale proportionally, from the corner.
- The guide lines show the cap height and baseline the lockup is aligned on.

logo

Pick the version by the space, not by taste. When the primary logo would render smaller than 24 px tall, switch to the symbol.

Favicon

The symbol on the primary colour at 48, 32 and 16 px.

One colour

For single-colour print, embossing and stamps.

Reversed

On dark grounds and photographs, in one light colour.

On primary

On the primary colour, in its on-colour; for covers and large brand moments.

Every logo part keeps at least 3:1 against its ground. Where the colours cannot, the logo switches to one colour.

colours

Band heights show how much of each colour a typical page uses. Large areas take the ground and primary; the accent stays small.

PRINT

Screen values are exact. For print, ask your printer for CMYK/Pantone matches made with their profile; the Lab D50 values are the reference to match against.

TINTS

80, 50 and 20% for charts and backgrounds only, never for text.
